

– Heart & Soul –

“Heart & Soul” is one of three stained glass windows designed to share the importance of the covenants between God, the Jewish people, and all life. Touching on the past, the present, and the future, these covenants set forth the path to the fulfillment of our destiny, as they are seen being passed from generation to generation.

The love required to achieve our destiny of peace is embodied by the words of the *Shema* prayer, found both in the Torah scroll and in the sounds coming forth from the shofar.

The rainbow shofar represents the call to all peoples, as it relates to these universal aspects of love.

The individual upholding the Torah symbolizes our responsibility to be a light of the nations.
