

# ***– Jonah’s Journey of Discovery –***

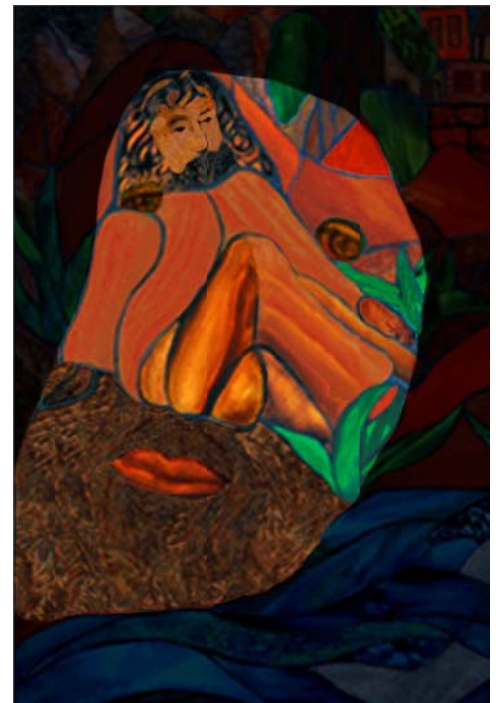

This stunning glass mosaic design depicts the adventures of the prophet Jonah, as he sets out on his path of redemption and enlightenment. The explosiveness of the raging sea and the intensity of the sun's heat, as well as extensive hand painting, create a flowing, radiant design that illuminates the feeling of this incredible quest.

Notice how the tail of the whale is also the body of Jonah.

To portray the concealed, mystical aspects of this parable, there is a large hidden face woven into the design of Jonah, as he sits beneath the leaves of the large gourd-tree on the left side of the composition.

If you look closely, you will see how the pants of the small Jonah form actually compose the nose of the large face, while the rock Jonah is sitting on also becomes his beard.
