

– *Storytelling Seder Plate* –

This "Storytelling" Seder Plate was designed to assist in the mitzvah of retelling the Passover story. It visually depicts many of the noteworthy events and their symbolic significance in connection with the items included on the seder plate.

Each section of the design depicts part of the events leading to the Exodus of the Jewish people from Egypt, and the reason for our Passover celebration. In the center of the design, Moses, Miriam and the people are seen giving thanks for their new freedom.

This special Seder plate is hand etched and sandblasted many layers deep in order to create this exquisite and unique piece of art. Each of these plates requires an enormous amount of time to capture all the intricate details while working on so many levels. Since no two are exactly alike, each one is essentially an original work of art.

The numbers of available pieces are extremely limited and must be individually ordered in advance.
